MEMORANDUM FOR: Project Director

THROUGH : Director of Operations  
THROUGH : Project Contacting Officer  
THROUGH : Project Director for Administration

SUBJECT : Receipt of Materials from Processing Site

1. The first batch of "live" material was received from the processing site Friday evening, 29 June. A number of errors were encountered in the packaging of materials and information regarding the shipment. These errors entailed a loss of a substantial number of manhours and it is hoped that they may be corrected on subsequent shipments.

2. A major error was the failure to indicate the composition of the shipment. The information provided D/GP indicated a full shipment including the negative, positive and prints. On receipt of the material it developed that only prints had been shipped. Personnel had been assigned to work over the week-end to exploit the material and since they could not be used, were released after reporting for work. This not only wasted manhours but if repeated could raise morale problems since private week-end plans had been cancelled.

3. On checking the incoming material it was found that there were many errors in boxing prints. This entailed a loss of 30-40 manhours in reorganizing the prints. A list of the major errors is provided below.
